

**reFRESH Waterlines Project  
Jefferson Street  
Individual services to be connected to the new water main  
January 2 through January 10, 2018**

Beginning Tuesday, January 2 through January 10, crews will connect individual water services to the new water main. Crews will connect services on Jefferson Street (both sides) from Estero Boulevard to Shell Mound Boulevard. **Your water will be shut off one time (typically no longer than 30 minutes but may be up to 2 hours) during the next week while crews make the connection to your water meter.** The shut-off will occur between 7 a.m. and 5 p.m. Crews will make every effort to contact you just prior to shutting off your water. You will **NOT** need to boil your water when the water connection is complete.

The reFRESH Waterlines team is replacing the water system throughout the Town of Fort Myers Beach to improve services to businesses and residents on the island. Just as the Town is replacing old pipes within the right-of-way, property owners may also need to update their private systems leading to and contained within their homes and buildings.

This notice is to inform you that the Town's reFRESH Waterlines team will soon be connecting your residence to the new water main as part of the Town of Fort Myers Beach Waterline Replacement Program. Due to the age of many homes and the aging plumbing systems within them, you may experience plumbing issues and should be prepared to contact a licensed plumber for repairs.

If you have any questions about this notice, please contact the reFRESH Waterlines public information office Cella Molnar & Associates, Inc. at 239-337-1071 or via email to [kmolnar@cella.cc](mailto:kmolnar@cella.cc).
